

**Amendments to the Specification:**

Please replace the Abstract, beginning at page 25, line 9 with the following amended Abstract:

The present application discloses a system for determining ~~relates to~~  
document boundaries ~~boundary determination including an image sensor, a~~  
backing opposed to the sensor, and an image processor. The image processor  
analyzes candidate edges imaged from a document between the sensor and the  
backing. The image processor determines which candidate edges are document  
boundaries.
